PROFESSIONAL EXPERIENCE

Engineering Manager | Wiley Global Technology | Jul 2024 – Sep 2026

- Lead the team of 26 across Sri Lanka, Brazil and Jordan including team lead, coordinating application support and service delivery across the three locations.
- Monitor SLAs, KPIs, ticket queues, and backlogs to assess service performance, identify areas for improvement, and take appropriate actions to maintain service quality and meet agreed targets.
- Guide the team through complex incidents and service requests, investigate recurring problems and agree actions to prevent them happening again.
- Work with Development, Product and Business teams to resolve issues after releases and improve the handover between development and support.
- Review support processes and introduce automation where it can reduce manual work and help the team provide a more reliable service.
- Involved in recruitment activities, helping identify and select suitable candidates for the right roles based on their skills and experience.
- Coached and mentored new team members, identified knowledge gaps, and worked with them to strengthen their technical skills and overall performance.
- Conducted performance reviews and established clear team objectives and individual goals to support year-end performance assessments.
- Organized workshops across multiple locations, including Jordan and Brazil, and facilitated cross-training sessions to strengthen L2 support capabilities and promote application knowledge sharing.

Software Support Lead / Associate Lead | Wiley | Oct 2022 - Jul 2024

- Lead the 5 team members in local team (Sri Lanka)
- Tracked SLAs and KPIs to keep support delivery in line with agreed service standards.
- Led incident, service request, problem and change management activities, helping teams restore services and introduce changes in a controlled way.
- Coordinated critical incidents and technical escalations, bringing technical and business teams together to resolve issues and limit disruption.
- Worked with technical teams to find the causes of recurring issues and put corrective and preventive actions in place.
- Coordinated releases and the transition of applications into support, checking production readiness and arranging knowledge transfer.
- Worked with Development and Support teams to improve day-to-day workflows. Mentored colleagues and assigned responsibilities based on their skills and business needs.

Senior Engineer | Wiley | Oct 2020 - Oct 2022

- Supported application transitions and managed ticket backlogs for global customers.
- Built dashboards to monitor application performance and help the team identify recurring issues.
- Kept Confluence knowledge articles, runbooks and operating procedures up to date.

Associate Consultant / Engineer | Virtusa | Mar 2015 - Oct 2020

- Resolved incidents and handled service requests for global clients, including British Telecom and CSG International.
- Set up server alerts and monitored systems using ELK / Kibana and Zabbix.
- Carried out server patching, system upgrades and live-data updates using SQL.
- Worked with R&D and L3 teams to investigate problems and implement permanent fixes.

Trainee | Sri Lanka Telecom | May 2014 - Nov 2014

- Gained practical experience in routing and switching, OSPF and EIGRP protocols, and server monitoring using OpenNMS.
